STAZA PLIVANJA

Plivanje se odvija na kružnoj obeleženoj stazi u smeru suprotnom od kazaljke na satu. Start i cilj su na istom mestu. Plivači su dužni da bove obilaze sa desne strane. Ulazak u ciljni koridor obeležen je narandžastim linijama i vertikalnim markerima. Plivači su dužni da rukom na kojoj nose čip narukvicu dodirnu ciljni luk kako bi senzori detektovali rezultat. Prosečna dubina vode na stazi plivanja je 2-7 m. Materijal dna jezera je šljunak. Na svakom okretu nalaze se sudije koji vrše kontrolu pravilnog prolaska plivača oko bova. Tokom trke, na svakom završenom krugu mere se i beleže prolazna vremena za svakog takmičara.

SWIMMING COURSE

The swimming takes place on a marked circular course in a counter-clockwise direction. The start and finish lines are in the same location. Swimmers must clear the buoys on their right side. The entrance to the finish chute is marked with orange lines and vertical markers. Swimmers are required to touch the finish arch with the hand wearing the chip wristband for the sensors to detect their result. The average water depth along the swim course is 2 to 7 meters. The lake bed consists of gravel. Judges are positioned at every turn to monitor and ensure the correct passage of swimmers around the buoys. Split times are measured and recorded for each competitor at the end of every completed lap during the race.
